Institute for Software Research
University of California • Irvine

ISR Research Forum
Where Research Meets the Real World
Friday May 27, 2016
9:00 am – 5:30 pm
University of California, Irvine ▶ 6011 Donald Bren Hall

You’re Invited!

Join us for the 2016 ISR Research Forum! This one-day event brings together researchers, leaders in industry, and technical practitioners in a multi-disciplinary environment to: discuss research and trends in the fields of software development and interactive and collaborative technologies; showcase current ISR research; and formulate visions on strategic future research and technological directions. We encourage interaction among academia and industry through exchange of ideas and sharing of experiences. Our goal is to foster relationships, stimulate collaborative research, and encourage technology transition. ISR has research emphases spanning a broad range of areas from collaboration technology, to software testing, to software architecture, and more. Impacts from our past projects have been many and highly significant: we hope you will join us as we look to the future and explore new ideas and new applications.

Richard N. Taylor, ISR Director

PROGRAM

9:00 - 10:30
UC Irvine Faculty Presentations:
✦ Simulating Cities: A Systems Design Perspective, Cristina Videira Lopes
✦ Crowd Design, André van der Hoek
✦ Mobile App Security: Detection and Family Identification of the Malice in your Pocket, Sam Malek
✦ Global Software Engineering: Industry and Research, David Redmiles

11:00 - 11:50
Keynote I
Software Architecture: The Dismal Science
Dr. Eric Dashofy
Principal Director of Development, Enterprise Information Services
The Aerospace Corporation

11:50 - 1:50
Open House: Tour Labs, See Demos and Posters, Meet Faculty and Students, Enjoy Lunch!

1:50 - 2:50
UC Irvine Faculty Presentations:
✦ TIPPERS: A Test Bed to Explore IoT Privacy in Bren Hall, Nalini Venkatasubramanian
✦ Studying the Quantified Workplace, Yiran Wang
✦ Reflections from a Decade of Expert Witness Engagements: A Software Engineering Perspective, Richard N. Taylor

3:00 - 3:50
Keynote II
Software Engineering at Google Scale
Dr. Marija Mikic
Software Engineering Manager
Google

4:00 - 5:30
Reception

Registration: This event is FREE but space is limited – advance online registration is strongly recommended.

For more information: contact Debra A. Brodbeck, ISR Assistant Director, brodbeck@uci.edu, (949) 824-2260 or visit the Forum website.
