ICSE

Call for Papers: Education Track

General Chair
Leon J. Osterweil, *U. of Massachussetts, USA*

Education Track Chair
Laurie Williams, *North Carolina State U., USA*

Program Committee
Laurie Williams (Chair), *NCSU, USA*
Robert Biddle, *Carleton University, Canada*
Stefan Biffl, *Vienna U. of Technology, Austria*
Jeff Carver, *Mississippi State, USA*
Sungdeok (Steve) Cha, *KAIST, Korea*
Robert Dupuis, *U. Quebec at Montreal, Canada*
Orit Hazzan, *Technion - Is. Inst. of Tech., Israel*
Pankaj Jalote, *IIT - Kanpur, India*
Philippe Kruchten, *U. of Br. Columbia, Canada*
Richard LeBlanc, *Southern Catholic Col., USA*
Charlie McDowell, *UC Santa Cruz, USA*
Dan Port, *University of Hawaii, USA*
Hossein Saiedian, *University of Kansas, USA*
Michal Young, *University of Oregon, USA*

SIGSOFT
SPECIAL INTEREST GROUP ON SOFTWARE ENGINEERING

IEEE

IEEE COMPUTER SOCIETY

The Software Engineering Education and Training Track of ICSE 2006 will provide a forum for sharing recent advances, trends and concerns with software engineering education.

Scope

The ICSE Software Engineering Education and Training Track welcomes high-quality submissions on topics related to software engineering education. Use of sound research design and empirical analysis supporting findings is strongly encouraged. Experience reports are welcome, though an emphasis should be placed on justifying and explaining conclusions using careful analysis and on providing a thoughtful retrospective. Topics of interest include, but are not limited to, the following:

- Educational modules and resources in emerging areas, such as security and privacy.
- Integration of research results into software engineering courses.
- Use of innovative pedagogical techniques in software engineering education.
- Use of Open source tools in software engineering courses.
- Integration of agile practices in software engineering courses.
- Educating undergraduate and graduate students in research methods.
- Forming learning communities among undergraduate and graduate students.
- Accrediting undergraduate software engineering degree programs.
- Use of the Software Engineering Body of Knowledge (SWEBOK) and the Software Engineering Volume (SE2004) of the Computing Curriculum in course/curriculum design.

Review and Evaluation Criteria

Each submission will be reviewed by at least three members of the Education Track program committee.

Submitted papers will be evaluated on the basis of originality, importance of contribution, soundness, empirical analysis, quality of presentation, and comparison to related work (as appropriate). Papers submitted for consideration must not have been published elsewhere and must not be under review or submitted for review during the duration of consideration.

Submission Structure

Your paper must conform to the ICSE 2006 Format and Submission Guidelines and should not exceed six pages, including all text, references, appendices, and figures.

Important Dates

Submission Deadline	1 October 2005
Notification of Acceptance	20 December 2005
Camera-ready Copy Due	24 February 2006

The submission deadline is firm and no extensions will be given.

Acceptance

All accepted contributions will be published in the conference proceedings. CDs of the proceedings will be distributed at the conference.
